

## News release

# Sofyne Active Technology renews and extends their ISO 27001 certifications, affirming its commitment to data confidentiality and security.

Lyon (FRANCE) – 24<sup>th</sup> July 2024

**Sofyne Active Technology's successful renewal of its ISO 27001 certification on July 24<sup>th</sup>, 2024, is a testament to the organization's unwavering dedication to upholding the highest standards of information security and data protection. This achievement is particularly noteworthy given the extended scope and heightened expectations of the recertification process.**

## Sofyne Active Technology's Commitment to Operational Excellence and Client Data Security

The transition to the latest ISO 27001:2022 standard, as well as the extension of the certification to Sofyne's operations in London and Switzerland, coupled with the recertification of its offices in Porto, Krakow, and France (Paris & Lyon), underscores the company's relentless pursuit of excellence. This comprehensive coverage across Sofyne's diverse activities reinforces its commitment to ensuring its customers can entrust their sensitive data with the utmost confidence and security.

This milestone renewal is a clear demonstration of Sofyne Active Technology's proactive approach to safeguarding its clients' information and upholding its reputation as a trusted partner in the industry. By continuously aligning its processes and systems with the evolving global standards, Sofyne Active Technology solidifies its position as a leader in information security, further cementing its ability to deliver exceptional value and peace of mind to its growing customer base.

*For Cyril Marnat, Lead Data Manager & ISMS Manager at Sofyne:*

---

*" This achievement is a testament to the company's dedication to protecting its customers' data and maintaining the highest levels of confidentiality and integrity.*

*As Sofyne Active Technology continues to grow and evolve, its unwavering commitment to information security will remain a key driver of its success."*

---

## A continuous commitment to Information Security

As a leading provider of services to the digital industry, we take seriously our responsibility to create an environment of trust throughout our ecosystem.

We are committed to protecting all the data entrusted to us, as well as defending our business against cyber-attacks.

*For Cyril Marnat, Lead Data Manager & ISMS Manager at Sofyne:*

---

*" Sofyne Active Technology's ISO27001 certification is not a one-time achievement but rather a continuous process of improvement and adaptation. The company's ISMS is subject to regular audits and reviews to ensure that it remains effective and aligned with the latest industry best practices.*

*This ongoing commitment to information security is a core part of Sofyne Active Technology's organizational culture. The company's employees are trained and empowered to identify and address potential security risks, and the company's leadership team is actively involved in the oversight and management of the ISMS."*

### About Sofyne Active Technology :

SOFYNE Active Technology is a leading IT services company specialized in MES/MOM (Manufacturing Execution System/Operations Management) and PLM (Product Lifecycle Management) domains.

We have 200 consultants across 5 Countries (France, United Kingdom, Swiss, Poland & Portugal), ensuring our customers can tap into the power of the Industrial Internet and the Industry 4.0 disruptive concept.

The acceleration of product customization, regulatory constraints, cybersecurity, etc., are currently putting more pressure on industrial processes.

The principles of Industry 4.0, or digitalization of the industrial process, provide proactive solutions to overcome these disruptions. SOFYNE Active Technology is present to help our clients evaluate, administer, and maintain these new solutions by implementing MES/LES systems, which allow for strategies to surpass any new challenges. Our mission to our clients is to improve the effectiveness of the management of production activity, optimize quality, control logistic chains and production methods.

Our teams have accrued experience from a myriad of projects since 2005. This acquired knowledge is what enables us to best understand how these evolutions impact your information systems.
